## Blood Poison!

Years of remarkable success is the record of what is probably the most satisfactory preparation for this disease ever produced.

"Cut-after others had failed" is a testimonial often received as a result of its use. This preparation is the result of a scientific study of the disease, extending over a long period of years. It has a record of fifteen years extraordinary success, and has cured many, many cases that had been pronounced hopeless. It has had wonderful effects especially in advanced stages, and after other treatments had failed. This remedy is the famous

It is equally effective in treating the attendant ill and after effects of this disease, such as old sores, catarrh, rheumatism—wonderful results in epilepsy, etc., when resulting from this disease. It has restored thousands of cases that were suffering from the after effects of poisonous drugs taken for this disease.

ALKANO is purely vegetable, and though powerful, is absolutely non-injurious. It has never caused injury or left injurious after effects, on the contrary, it leaves the system healthy and invigorated.

The following are examples of statements we receive:

"More rapid and powerful results than with the classical preparation."—Dr. J. Barrois, of the General Hospital, City of Mexico.

Three bottles cured case in worst form.—"Cartier, Oklahoma."

"Had disease five years. Tried everything. Cured by ALKANO. Lento, Shivers, Miss."

ALKANO is purely vegetable, and though powerful, is absolutely non-injurious. It has never caused injury or left injurious after effects, on the contrary, it leaves the system healthy and invigorated.

FREE Send for copy of our free booklet that fully describes ALKANO, and gives proof of its remarkable curative properties. Also send description of your case, and we will tell you what results you may expect from ALKANO.

## INSECT TO BLAME SAY SCIENTISTS

Six-Legged Specimen Causes That Sloughful Feeling During Summer.

By Victor Elliott.

WASHINGTON, Aug. 11.—The "harvest disease," which heretofore had been attributed to errors of diet, over-exertion or poisoning, has been traced to a minute, six-legged insect. This bit of "sloughing" performed by the United States public health service, is explained in one of its interesting bulletins just published.

The disease is described as "frequent occurrence, seldom recognized and widely disseminated."

The troublesome little insect which we can now blame for much of our sloughing is a tiny creature known as the "jigger," "chigger," or harvest mite.

The harvest mite belongs to a family notorious for the misbehavior of its members. The tiny mite is a leading member which long has afflicted the human race.

The adult jigger is harmless, according to the public health bulletin. It apparently loves freedom of the woods and open fields, utterly ignoring all human intruders.

The young, however, which are hatched in July and August, display considerable regard for human society, willingly forsaking their natural habitat for the uncertainties of life with man.

When they find lodgment upon the skin they at once begin to penetrate its outer layers by burrowing. At this stage the trouble starts.

The irritation, at first mild, becomes intense as the burrowing proceeds and is accompanied by redness, swelling and inflammation. Frequently the eruption resembles that of hives or even eczema and the itching is so severe that lesions due to violent scratching ensue.

The burrowing proclivities of the mite is inexplicable and apparently without reason to the public health service, as the mite invariably perishes within a few days after beginning their nefarious work.

Early treatment of jigger rash or trombidiosis, as it is known to scientists, is recommended. Several remedies are suggested, including sterilized needles, for plucking the intruder out, counter irritant and bathing directly after exposure.

"The best treatment is, however," says the report, "by avoidance of the haunts of the tormentors."

from Fort Wayne for a short visit with friends.

Mrs. Helen Speucker left Tuesday for her home in Detroit after a few days' visit with friends here.

Miss Helen Ladewiczak, 722 Monroe st., returned from Chicago this morning where she has been for the past few days visiting with friends.
